Research Interests

My research interests lie in **data-centric AI**, **multi-agent reasoning**, and **scientific equation discovery**. In particular, I focus on data-centric methods to enhance the robustness and effectiveness of machine learning; multi-agent frameworks for structured knowledge extraction and reasoning; and interpretable methods for equation discovery to uncover scientific patterns from data.

Education

Ph.D., Computer Science, Arizona State University, 2023 - present
M.S., Computer Science, Sichuan University, 2016 - 2019
B.E., Computer Science, Sichuan University, 2012 - 2016

Work Experience

Research Intern, Data Science & System Security Department
NEC Laboratories America, Inc., Princeton, May 2025 - August 2025

- Developed **multi-agent LLM** frameworks for structured knowledge extraction (procedural graph representation), supporting downstream retrieval-augmented generation (RAG). Explored how structured knowledge enables **personalized LLM** training by grounding user-specific workflows into structured representations.

Research Intern, Institute of High Performance Computing
A*STAR, Singapore, June 2024 - August 2024

- Investigated **trustworthiness of LLMs** in medical applications, with emphasis on understanding how **jailbreak attacks** compromise system reliability. Conducted systematic analysis of jailbreak strategies as a foundation for designing future LLM safety and protection mechanisms.

Full Time, Platform and Content Group
Tencent, Beijing, November 2020 - August 2022

- Led algorithm design for **time-sensitive search scenarios** (e.g., weather, stock, news), serving hundreds of millions of users. Designed methods for query time-sensitivity detection, retrieval pipeline optimization, and time-aware ranking and presentation to enhance freshness and relevance in search results.

Full Time, Digital Media & Entertainment Group
Alibaba, Beijing, June 2019 - October 2020

- Built **recommendation systems** for long- and short-form video platforms (movies, TV shows, variety shows, and micro-videos). Worked on **video content understanding** (e.g., tagging, user profiling) and **video retrieval**, improving large-scale recommendation quality and user engagement.

Honors

- KDD 2024 Travel Award
- National Scholarship, Top 1%, 2019
- Postgraduate Scholarship in Sichuan University, 1st Prize, Top 1%, 2018, 2019
- Outstanding volunteer of the 8th China Intelligence Industry Summit, 2018
- Robomaster Competition, 3rd Prize, 2015

Professional Activities and Services
